

Toolshare Walkthrough & Questionnaire

- 1) Tell tester to create a new account
- 2) Have them log in with that account (this will be as a student)
- 3) Explain they will now be acting as a student trying to book items
- 4) Have user checkout multiple items at once
- 5) Have user go to cart and attempt to complete checkout
- 6) Tell user to check their items' status
- 7) Tell them to logout
- 8) Login as faculty that owns at least one of the items they booked
- 9) Tell them now to imagine they're faculty member
- 10) Ask them to check the borrow requests that were just made for their items
- 11) Tell them to approve one and deny the other
- 12) Show them the add item page and tell them to add an item (this can be deleted later)
- 13) Show them the ability to edit and delete tools
- 14) Have them edit the tool they just made
- 15) Have them delete the tool they just made
- 16) Go back to items that were booked
- 17) Checkout the approved item
- 18) Upload a condition image
- 19) Return the checked out item
- 20) Upload a condition image
- 21) Show them the booking history page
- 22) Log out and end the demonstration

Take notes if at any point they struggle to complete one of these tasks. Do not walk them through step by step. If there is a point where it isn't obvious to them how to do what you are asking, take notes, then help them through that step.

Questions:

- 1) Were there any parts of the website that looked out of place?
- 2) Were there any steps that felt overly complicated and/or unnecessary?
- 3) Do you think that the students and/or faculty are given enough information about the tools they are borrowing/lending out
- 4) Did you have a smooth experience as a student and/or faculty member
- 5) What change would you make to this website
